

IBM **Watson IoT**

IBM Watson IoT for Manufacturing

Watson IoT offers a full set of capabilities that enables our clients to transform their business

Transform with Cognitive

Drive better results with cognitive capabilities to improve engagement and predictions

Analyze and Predict

Apply powerful analytics to drive actionable predictions and make better decisions

Visualize the patterns

Visualize your data and distill useful information to see patterns of insight

Connect & Secure

Bring together the right data onto a versatile, scalable and secure platform

IBM Watson IoT Solutions

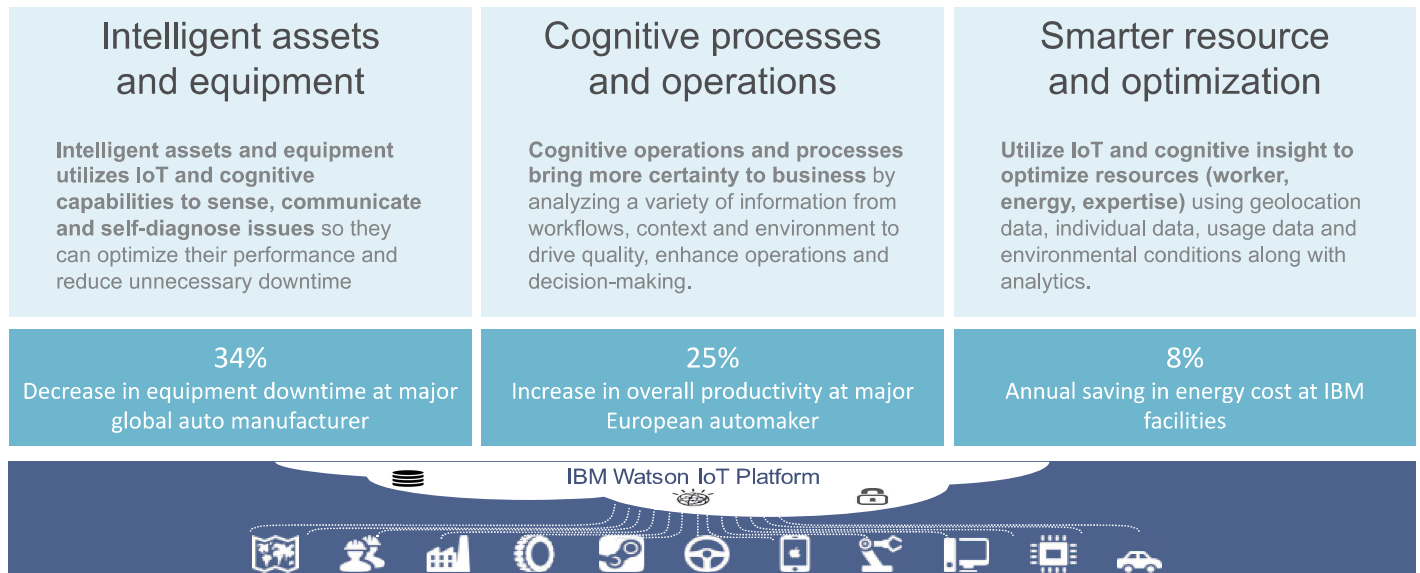

Packaged Applications

Design	Operate	Manufacture	Service
--------	---------	-------------	---------

IBM Watson IoT Platform

The diagram consists of three horizontal layers. The top layer is a teal banner with the text 'IBM Watson IoT Solutions' and a collage of images including a globe, industrial machinery, a tractor, a smartphone, an oil pumpjack, and a car. The middle layer is a blue banner with the text 'Packaged Applications' and a central image of a person working at a computer. Below this are four boxes labeled 'Design', 'Operate', 'Manufacture', and 'Service'. The bottom layer is a dark blue banner with the text 'IBM Watson IoT Platform' and a row of icons representing various IoT devices and services like a car, a lightbulb, a smartphone, a medical cross, a server, a gear, a laptop, a lightbulb, a TV, a wrench, and a keyboard.

IBM Watson IoT for Manufacturing drive cost savings and operational efficiency across the factory value chain

Differentiating elements of Watson IoT technology and ecosystem
