DIGI®

Modernize Your Digi PortServer TS Connectivity Solution

Digi Connect EZ is secure, fast, and easy to deploy.

Why replace equipment when you can update the way you talk to it?

Digi Connect® EZ revolutionizes operational infrastructure with its enhanced network connectivity and advanced functionalities that cater to a wide range of applications. It is specifically crafted to address the pressing needs of critical serial applications, like automation, robotics control, centralized device management, data acquisition, and point-of-sale equipment. Upgrade your infrastructure with Digi Connect® EZ and experience streamlined operations like never before.

In today's fast-moving industries, staying ahead means embracing the latest and greatest technology. That's where the Digi Connect® EZ family of products comes in. While Digi PortServer® TS has long been a rock-solid choice for automation connectivity, the Digi Connect® EZ line raises the bar with lightning-fast speeds and advanced connectivity options. This powerful family of products will usher in a new era of efficiency and productivity, freeing you from the limitations of the past. Don't wait — upgrade to Digi Connect® EZ and take your business to new heights.

Security

Digi Connect EZ and built-in Digi TrustFence® protect against evolving security threats with encrypted connections, centralized authentication, VPN support and scalable security updates.

Flexibility

Configure in minutes without having to modify equipment or applications. Digi Navigator™ allows for the discovery of Connect EZ devices on a local network for a quick and easy setup.

Manageability

Simplify key security requirements for critical infrastructure and distributed systems with enhanced access control, management and configuration capabilities.
